

ENERGY POLICY MODERNIZATION ACT OF 2015

A Road Map to American Energy Security

Enhances Energy efficiency

- Reauthorizes weatherization and state energy programs
- Coordinates energy retrofiting assistance for schools
- Facilitates building training and careers skills training

Improves Energy Infrastructure

- Streamlines U.S. LNG export approval process
- Enhances cybersecurity safeguards
- Modernizes U.S. electric grid
- Maintains the Strategic Petroleum Reserve

Improves Accountability

- Reforms DOE loan program to protect taxpayers
- Prioritizes grid reliability
- Cleans up redundant & out-of-date U.S. code

Increases America's Energy Supply

- Promotes geothermal and hydropower development
- Provides for marine and hydrokinetic renewables
- Authorizes research to develop methane hydrates
- Modernizes critical mineral policies to end U.S. reliance on foreign supplies
- Ensures a well-trained workforce

Promotes Conservation

- Reauthorizes the Land and Water Conservation Fund
- Creates a new fund to address maintenance backlogs at some of our national parks
