

# ENERGY & NATURAL RESOURCES

---

**TOP LINE:** The Senate Energy and Natural Resources Committee's title will restore American energy dominance, reduce the deficit, unlock underutilized federal land for affordable housing, streamline domestic production, and repeal wasteful Green New Deal spending —**delivering lower energy costs, more housing, and greater prosperity for American families.**

## ACHIEVING AMERICAN ENERGY DOMINANCE:

- Repealing billions in unspent Green New Deal handouts.
- Generating over \$15 billion in federal revenue through expanded oil, gas, coal, and geothermal leasing.
- Restoring quarterly lease sales and commonsense permitting timelines for domestic energy producers.
- Cutting burdensome royalty rates to make U.S. production globally competitive again.
- Authorizing responsible development in ANWR, NPRA, and offshore Alaska.
- Increasing timber harvests and geothermal leasing.
- Refilling the Strategic Petroleum Reserve and enhancing energy security.
- Ensuring states and counties benefit from energy projects on federal lands.

## CONSERVATIVE WINS:

- Repeals \$6 billion in Biden's unused climate slush funds
- Unleashes America's vast oil, gas, coal, and geothermal reserves
- Restores lease sales blocked by the Biden Administration
- Reduces royalty rates to pre-IRA levels to jumpstart production
- Slashes permitting red tape and delays
- Saves taxpayers at least \$24 billion
- Funds the Strategic Petroleum Reserve with American energy, not foreign imports
- Ensures rural counties share in renewable revenues
- Unlocks land for millions of affordable homes
